

Backscatter electron  
images of treated  
tailings, embedded and  
polished

Minerals identified via  
Energy Dispersive X-ray  
spot analysis

25.0kV x500 50μm

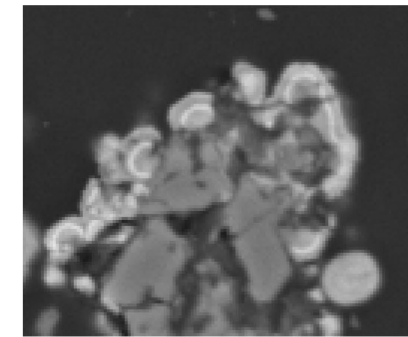

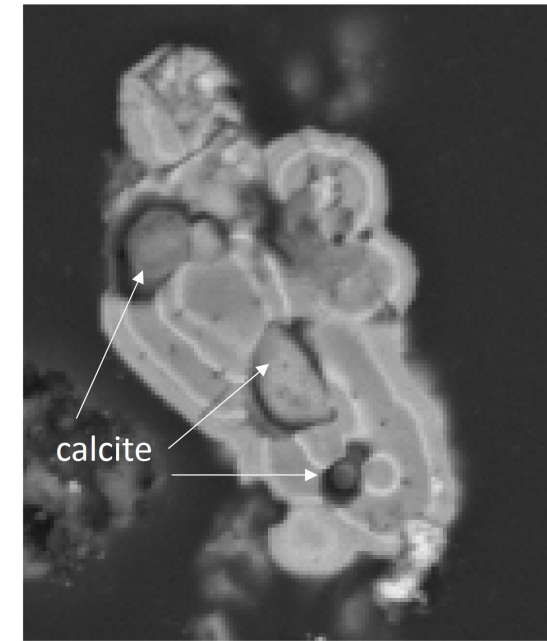

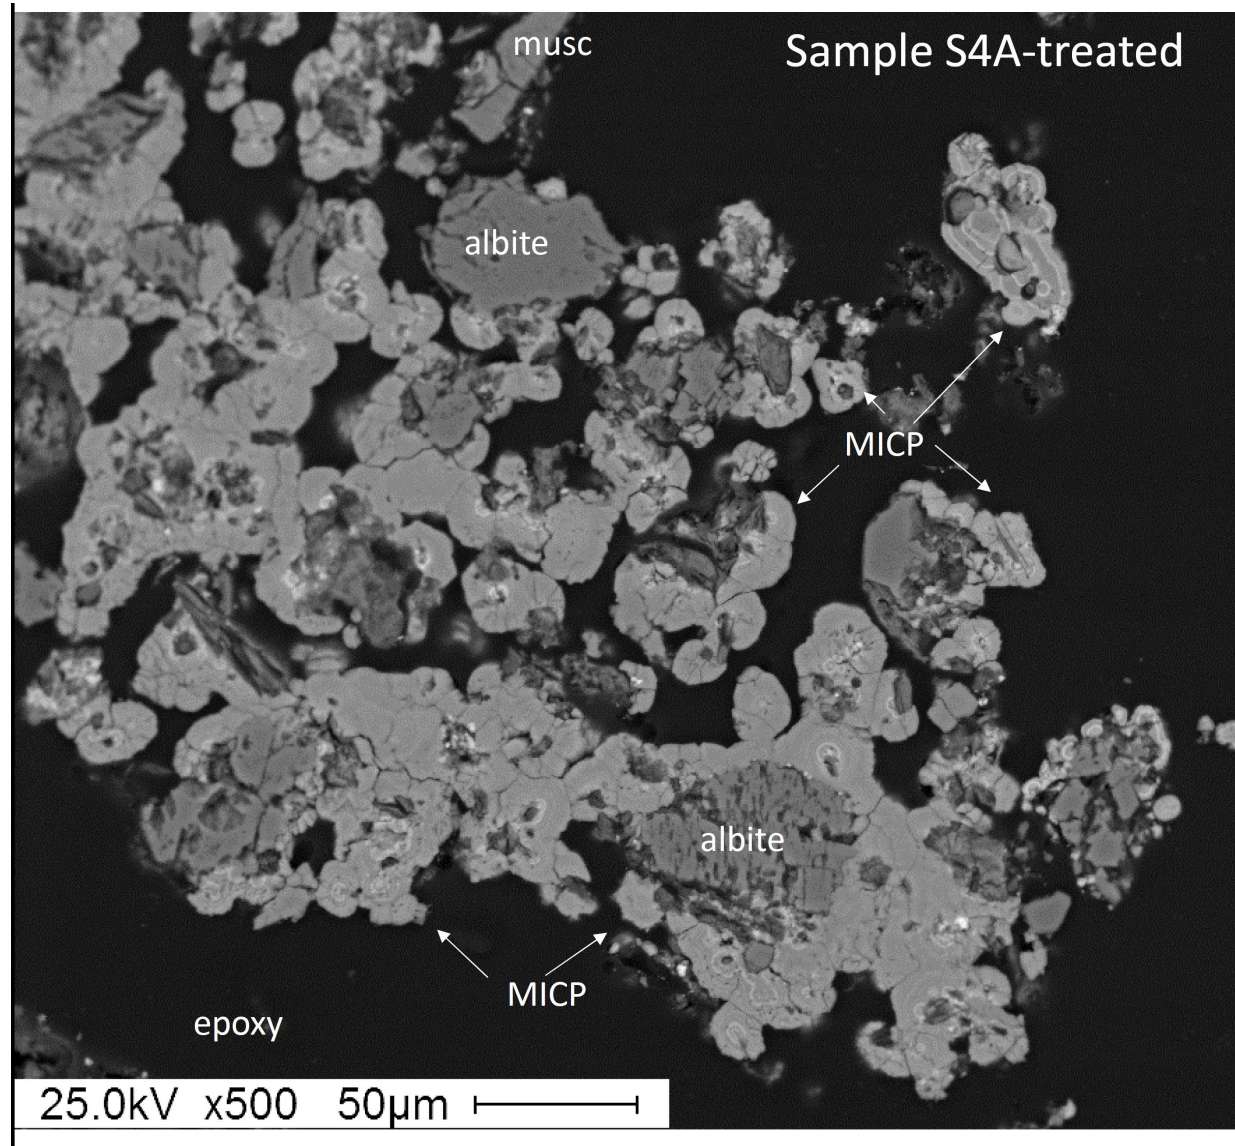

Sample S2-treated

Chris Gammons, MT Tech

# Backscatter electron images of treated tailings, embedded and polished

Bright bands are Pb- and Zn-rich MICP  
(up to 7 wt% Pb, 4 wt% Zn)
